Upgrade Notes on
CARL.X 9.6.5. CARL.Connect 1.6.1, and CARL.Discovery 3.6

CARL.X

1. Improved Dynamic Routing
    a. Previously, the ROUTER utility needed to be ran to achieve updates to the router list.
    b. Now, as customer or staff place holds, reactivate suspended holds, suspend holds, or cancel holds, updates will automatically occur in the fill list or router list. The transactions occur in real time

CARL.Connect

2. Several user interfaces throughout CARL.Connect have been updated to help with accessibility and function
3. Check Out
    a. Check Out now displays Your Branch Summary and System Account Summary together
    b. The finish/receipt and collapse/expand options are now in the center of the screen
    c. The count of checkouts/denied now shows
4. Fill List has improved dynamic routing
    a. Previously, the ROUTER utility needed to be ran to achieve updates to the fill list
    b. Now, as customer or staff place holds, reactivate suspended holds, suspend holds, or cancel holds, updates will automatically occur in the fill list. The transactions occur in real time.
    c. This should decrease the number of *Internal Server Errors* that occur on the fill list.

Catalog

5. An "Available Now" facet has been added
