Reports

- "Circulation By" Circulation Reports have the ability to pull back true in-house circulations in the results by selecting "no" in the parameters.

CARL.Connect 1.6.8

Further development of the Acquisitions module. Improvements were made to the grids/tables used throughout CARL.Connect, allowing users to resize columns and have that resizing remain throughout refreshes of the page.

Circulation

- Development to allow interactions in User Overview
 - Staff will be able to select one or more items and mark them *lost*, adding any associated fines and fees to the patron's account.
 - Note: There might be a bug in this development. A ticket has been submitted to TLC.*
 - Staff have the ability to update the patron's record from User Overview.
- The Checkouts grid has been updated to display both the transaction branch as well as the item's branch.
- Additional development of alerts in Check Out to ensure actions taken are appropriate when dealing with different blocks on patron accounts.

Bug Fixes

- Functionality improvements to alert lightboxes (manual hard block, soft block, user expired).
- Searching by Full Legal Name now works. (MLS reported bug)
- Improvements to the Manual Block workflow were completed. When changing a User Status to Manual Block, the note window will open, allowing library staff to enter the required note.

CARL.Discovery 3.6.6

Improvements to the kids catalog to show results faster.

Saved Lists

- Availability information listed instead of having to click on a "check availability" link.
- Will display the respective Download, Place Hold, or More Options buttons for OverDrive materials.
