PRESENTATION OF SERVICE CERTIFICATES TO LIBRARY STAFF

The Friends of the Metropolitan Library System have underwritten a staff recognition service program recognizing staff who have been employed by the Library System for five years or more. The Friends provide an attractive pin with the library system logo and name for staff who have served five years. After 10 years a ruby is added to the pin; subsequent rubies are added at 10, 15, 20 and 25-year intervals of service culminating with the addition of a diamond to the pin for 30 years of service. The Library System staff are presented with the pins at a special reception hosted by the Friends each year.

To complement that recognition of service in a formal way, the Metropolitan Library Commission of Oklahoma County presents service certificates of appreciation to Library System staff for these same increments of service. The staff to be presented with certificates will be recognized at each monthly meeting at which time the certificates are presented.

ITEM D: ADDITIONAL DESIGN SERVICES FOR THE SERVICE CENTER

On March 15, 2007, the Commission approved and awarded a contract to Studio Architecture for the design services of the library system's new service center in the amount of \$258,857.00. As design work proceeded, the scope of work increased which requires additional architectural fees. The original fee is based on the construction cost on the initial scope of work. The library system agreed to negotiate those increased costs upon completion of the bid documents but also included money in the FY2007-08 for the anticipated fee increase. The Scope changes included tilt up wall construction and additional serviceability upgrades such as flooring, tile and carpet tile. These items were presented to the Finance Committee at their meeting on July 19, 2007.

The construction documents are out to bid and the additional fees have been calculated for the increased scope of work and are \$71,500.00. This contract is considered a sole source and staff requests that the commission approve the additional amount for service center design fees.

ESTIMATE OF OTHERS PRESENT: 10

I. The meeting was called to order at 3:36 p.m. by Ms. Marguerite Ross, Acting Chair.

Roll was called to establish a quorum. Present: Cornelius, Graham, Ross.

Ms. Ross called for a motion to move into Executive Session for Discussion with Attorney, Courtney Warmington regarding anonymous allegations relating to employment practices

Pursuant to the Oklahoma Open Meeting Act, Title 25, Oklahoma Statutes § 307, (B) (4)-"Confidential communications between a public body and its attorney concerning a pending investigation, claim, or action if the public body, with the advice of its attorney, determines that disclosure will seriously impair the ability of the public body to process the claim or conduct a pending investigation, or proceeding in the public interest".

> Ms. Margaret Graham moved to go into Executive Session. Mrs. Carolyn Cornelius seconded. No further discussion. Motion passed unanimously.

The Committee went into Executive Session at 3:36 p.m.

Mrs. Cornelius moved to end Executive Session. Mrs. Graham seconded. No further discussion. Motion passed unanimously.

The Committee ended Executive Session at 4:20 p.m.

III. Ms. Ross entertained a motion resulting from Executive Session.

> Mrs. Cornelius stated the Administrative and Personnel Committee recommends that staff complete the revision of SH 510 Civil Rights Policy as soon as possible. Upon completion, the Administrative and Personnel Committee should be notified and the revised policy should be distributed to all staff immediately. The Committee recommends that the ongoing discrimination training continue either through classes or online training for all employees and that staff continues to monitor compliance with existing civil rights policies and procedures. Mrs. Graham seconded. No further Discussion. Motion passed unanimously.

IV. Ms. Ross referred to the Discussion, Consideration, and Possible Action: Report and Recommendations from Administration~ Medical Funding Account.

Mr. Ric Rea, Director of Human Resources provided a history of the Medical Funding Account. The current definition of the Medical Funding Account requires that a minimum dollar reserve be retained in the fund. The reserve represents a percentage of the prior year's total premium. The definition then requires that funds in excess of the calculated reserve amount be used to buy-down premium increases for the library system and employees. Due to continued health care cost increases the Medical Funding Account balance has deteriorated over the past several years.

Mr. Rea called on Mrs. Kelley Hoffman, Benefits Manager to explain the proposed new formula.

Mrs. Hoffman stated the recommended change is to revise the Medical Funding Account reserve formula to reflect a minimum retention of a dollar amount equal to 35% of the MLC - June 19, 2008 Prepared by: MLC Secretary Page 3 of 5

MLS - Report and Recommendation from A & P Committee Meeting: May 28, 2008

forthcoming Plan Year's Maximum Liability with the option to utilize the available surplus to buy-down premium contributions for the library system and employees. The revision would also provide for an annual Plan Year reconciliation and independent actuarial review.

Mrs. Graham moved to recommend that the Finance Committee and Library Commission revise the previously adopted Medical Funding Account definition (adopted in June 2002) replacing it with the formula stated. Mrs. Cornelius seconded. Discussion followed. Motion passed unanimously.

V. Ms. Ross referred to the Discussion, Consideration, and Possible Action: Annual Review of Human Resources ~ Salaries and Benefits.

Mr. Rea reviewed the recommendations from Administration. He referred to the salaries report and explained how the system compares to other surrounding systems in compensation for Librarians. The Metropolitan Library System's minimum salary range continues to be higher than Oklahoma Department of Libraries (ODL) and Tulsa City-County Library System (TCCL) and this year MLS is equal to Pioneer Multi-County Library System (PMC). Discussion followed.

As a part of the FY 2007-08 budget, a salary study was proposed and request for proposals were sought. One proposal was received, the contract was approved by the Commission and the results have been recently received. The library administration is still reviewing the findings of this study.

Mr. Rea stated based on the survey data, the predicted trends and the library's financial situation, the administration has included in the estimate of needs (preliminary budget) for FY 2008-09 a market adjustment of 4 % for all employees (full and part time) effective with the start of the pay period that includes January 1, 2009, and a merit increase schedule ranging from 0 to 3 % beginning July 1, 2008.

Additionally, the administration has included in the preliminary budget for FY 2008-09, the amount of \$52,000 for adjustments that might be justified after the review of the salary study has been completed.

Mr. Rea referred to Mrs. Hoffman to provide the Benefits portion of the report and recommendations.

Mrs. Hoffman reviewed the individual reports.

Administration requests that the A & P Committee recommend to the Finance Committee for inclusion in the FY 2008-2009 Budget the following recommendations regarding Salaries and Benefits:

COMMISSION MEMBERS PRESENT:

ESTIMATE OF OTHERS PRESENT: 9

I. The meeting was called to order at 3:31 p.m. by Mr. Jose Jimenez, Chair.

Roll was called to establish a quorum. Present: Leslie, Patterson, Smith, Jimenez, (Arrived: Nelson, 3:33).

II. Mr. Jimenez referred to Mrs. Donna Morris, Executive Director to present the report and recommendations from Administration.

Mrs. Morris explained the duties and history of the Public Services Committee for the new members recently appointed to the Committee.

Mrs. Morris referred to Kay Bauman, Deputy Executive Director/Library Operations to highlight the revisions to the policies.

Mrs. Bauman stated the revised policies have been reviewed by many staff including library managers, agency level staff, the security manager, Administrative Team, and also the library's attorney. Mrs. Bauman asked the committee to consider the entire documents being presented rather than any specific addition or deletion. She also asked the committee to point out any typographical or grammatical errors so they may be corrected.

Mrs. Bauman referred to AL 320 – Rules of Conduct Policy. This policy was initially adopted by the commission in 1976. The staff has been very thorough in reviewing the contents and the intentions of the policy. In the endeavor to provide an atmosphere that is conducive to the library's services and facilities it is necessary for staff to identify and clarify unacceptable conduct, which is what the revised Rules of Conduct Policy is designed to do. Mrs. Bauman added that it's important to be aware that the 1st step in dealing with unacceptable behavior is to go to the individual and educate them on what is expected while in the library. That will always be the first approach when possible. Questions and Discussion followed.

Mrs. Bauman stated the two main changes to AL 320 Rules of Conduct are the clarification of conduct that is unacceptable in the library and the addition of unsupervised children in the library as written in the AL 330 Responsibilities for Unsupervised Children in the Library Policy. There is an existing unsupervised children policy, but the language was not initially included in the Rules of Conduct policy. Mrs. Bauman called for questions relating to the Rules of Conduct policy. Questions and Discussion followed.

Mrs. Bauman referred to AL 330 – Responsibilities for Unsupervised Children in the Library.

Mrs. Bauman stated the policy for unsupervised children is an existing policy and is being revised to include an age limitation. The internal committee researched various library policies locally and throughout the United States to get an idea of what the standard is when dealing with unattended children in the library. After research and meeting with library staff the internal committee decided to revise the policy to reflect that children up to age 10 must have a parent/caregiver in the immediate vicinity of and in visual contact with the child. Other changes that were made to the policy were minor housekeeping type changes. Questions and Discussion followed.

Mrs. Bauman referred to AM 313 – Local History Permission to Use & Fee Schedule, a new policy being recommended by Administration for approval and inclusion in the Policy and Procedure manual.

Mrs. Bauman introduced Mr. Buddy Johnson, Librarian at the Downtown Library. Mr. Johnson works in the Oklahoma Collection Room. The Oklahoma Collection Room houses various items on local history including video, audio or high resolution digital images.

Mr. Johnson stated the policy will assist customers with their personal research or commercial endeavors. It will enable the system to share the great collection and be given proper credit when used by customers. Questions and Discussion followed.

Mrs. Morris stated a draft fee schedule is attached and will be taken to the Finance Committee for approval.

Mr. Jimenez called for a motion from the committee.

Mrs. Judy Smith moved to approve the recommendations from Administration for adoption to the Metropolitan Library System Policy & Procedure Manual revisions to, AL 320 Rules of Conduct; AL 330 Responsibilities for Unsupervised Children in the Library; and AM 313 Local History Permission to Use & Fee Schedule. Mr. Lee Alan Leslie seconded. No further discussion. Motion passed unanimously.

Mrs. Morris stated for the Committee's information, some minor housekeeping revisions were made to the following policies; AM 110~Delinquent/Lost/Damaged Materials; AM 200~Interlibrary Loan; AM 314~United States Government Documents; and AM 331~Transfer and Withdrawal of Materials.

Mr. Jimenez called for questions or comments. There were none.

The policy has been developed and both the policy and procedures for reporting financial concerns were included in the packets for review. If Landlord's audit shall disclose a deficiency in Percentage Rental paid for any Percentage Rent Year or Fractional Percentage Rent Year to the extent of three percent (3%) or more, Tenant shall promptly pay to Landlord the amount of such deficiency and in addition the cost of such audit. Information Technology Report -- 2008

"Tagged," "Tagged," "Check Screen," Tagged." These are words staff throughout the system and IT staff in particular have heard over a million times this year. RFID has been a "front and center" project and implementing RFID has been a time consuming, but worthwhile project for the library system this year. The audible signals allowed staff to scan items at a faster pace without having to keep their eyes glued to the screen.

In this report, we will give you an overview of the major projects that have been accomplished during the past year as well as the status of projects still in progress and some that are ongoing from year to year. Again, all of the projects highlighted took a lot of effort on the part of many staff and could not have been completed without the cooperation of other departments throughout the system.

Projects Completed

Radio Frequency Identification (RFID) Purchase & Implementation

RFID had been on our radar as a technology that we felt could pay great benefits for the library system. We had been monitoring the technology and the prices of the hardware and tags as well as standardizations in the industry.

This past year, we contacted TagSys, a major RFID vendor, to purchase equipment for additional development testing. We were very pleased with the results. With the planning for the new service center and sorting equipment that uses RFID technology a possibility for the new building, we decided to go ahead and seek pricing to see if it would be reasonable to consider as part of the plan. As we looked at pricing, we found that it had come down to a level that was reasonable for implementation within the library system. Our proposal for this first year was to retroactively tag all library materials and install the antennas and readers at all libraries.

Based on information provided by the vendor regarding how many items could be processed in a week with three stations, we estimated that it would take approximately 15 months to complete the tagging of all materials currently in the system. With our software and the separation of placing the tag in the book from the computer part of the process, we have been able to complete the tagging in just under seven months.

Staff are now able to check out/in multiple books in one pass. There are several other functions that are regularly performed that can also be used on multiple items at a time. We also believe this will reduce repetitive motion injuries as well as free up staff time spent on repetitive task so that they have more time to assist customers.

Implementation of System Reserve Labels

Each year the library fills over 900,000 customer requests for material through the system reserve process. Last year, we reported that a new process for system reserves had been

developed that would reduce staff time for processing reserves. An added benefit of the new reserve system would also be a reduction in books held/pulled unnecessarily and a reduction in cross-shipping between agencies.

This new system was implemented in September 2007. The system uses labels and assigns the item to a specific customer rather than creating a list to be searched by staff. When the item is located, the label can be applied immediately. The staff member then confirms through the computer that the item has been found and puts it with the outgoing mail to be sent to the library requested by the customer. The process has greatly reduced time required to process reserves and has worked very well. (Yeah! No more rubber bands!)

Public Printing Management System

Once we began offering computers for public use, we also had to deal with customers wanting to print items from the Internet or other software provided by the library. Print management has always been desirable but not easily attainable as there is no built in mechanism within the Windows operating system that provides an easy tool to manage printing. Up until this year, we have been using the honor system. We have allowed customers to print 10 free pages per day and then asked that they pay 15 cents per page for each additional page thereafter.

We have experienced many problems with customers printing a lot more than 10 pages and then not paying or printing and leaving things on the printer because they do not want to pay. We have also had requests to have color printing and for customers using wireless to be able to print from their computers.

In January, we implemented a commercial system that interfaces with our computers and handles most of the problems and requests that we have regarding public printing. We no longer offer any free printing but we have reduced the cost of black and white copies to 10 cents per page. We also added color printing at a cost of 50 cents per page.

The original version installed did not allow the wireless printing to work properly. The vendor has since provided an update that does allow the wireless printing to work. However, since every library was installed before the update became available, we will now need to go out to each library and perform upgrades and test before we can offer the wireless printing to customers. This is something we plan to complete within the next few months

We have had a few customers that were not happy with having to pay for printouts. For the most part, customers have been very pleased with the system and happy with the reduction in per page costs. We have even received customer thank yous from those that saw paper being wasted by printouts made and left on the printer or thrown in the trash.

Additional Changes made to Public Computer Scheduling

Additional changes were made to the public computer scheduling software to improve the fair scheduling of computers. We want the computers to be used, but we also want customers coming into the library to be able to get on without having to wait an extremely long time. If a

customer has had at least an hour of time and the first customer on the list has been waiting more than 10 minutes, the customer that has been told their time is up will not be allowed to sign up for additional time until the longest wait is less than 10 minutes. This has provided a small increase in the number of "unique" customers served. We will continue to look at this issue to see if there are ways to improve it even further.

We also added a "Park" function to the public computers. If a customer is on a computer and needs to step away for five minutes or less, they can "park" their session, take care of their business, then get back on the computer. This keeps them from having to logoff and sign back up and it also helps staff to know that a computer has not been abandoned as they can see that it has been parked and the customer will return.

Acceptance of Credit Cards

We have had customer requests to provide a way for them to make payments for fines or lost materials online or to allow credit card payments in the library. We began exploring what options we had to provide this service earlier this year and went live with online payment service through CyberMARS. There has been no advertisement that we now take credit cards except for the information that is printed on the overdue notices. In the first month of service, we have collected almost \$3400.

Our plans for the coming year will discuss how we plan to implement taking credit/debit cards at our circulation desks and Express Check units. Once we begin taking credit cards at the circulation desk and Express Checkout units, we believe collections will increase as many customers prefer to use a credit or debit card rather than carry cash.

Enhancements added to CyberMars/Library Catalog

Two major enhancements have been added to CyberMars/Library Catalog this year. The first enhancement was to add data from a service called Syndetics. There are several types of data that can be added from this service. We chose to add:

- Cover images (shows a small picture of the book cover)
- > Tables of contents (allows a customer to see chapters in the book)
- Fiction & Biography profiles (each profile gives list of characters, genre, and series information)
- Video & Music (cover images and annotations for almost one million video and music titles)
- Summaries & Annotations (gives a short summary of what the book is about)

The second enhancement added to CyberMars is a feature called a "Cart." A customer can add up to 500 items to their cart. Items in the cart can be selected and printed in four formats: brief (short bibliographic record), full (complete bibliographic record), MLA, and APA format. The customer can also have a list of selected records e-mailed to them in any of these formats. Items in the cart can also be selected and placed on reserve directly from the cart. Customers use the "Cart" feature to keep track of titles they've read, titles they want to read, items used for

reports and other purposes that meet their needs. This feature has been available since the first of 2008 and we've had over 12,000 carts saved to date.

Pressure Seal Forms for Overdues and Reserve Notifications

Late last year we found out that the printer we use to print all of the overdue and reserve notifications would no longer be able to be supported on a maintenance contract. Since this printer is critical to producing these notifications, we felt that it was imperative that we look at making a switch to a new type of notification. We had looked at pressure seal notifications in the past but some of the early technologies in this area were cost prohibitive for our application.

When we began exploring this option again, we found equipment and forms that were within our budget. The software that produces the two notices was re-developed and we began using pressure seal forms for the overdues in November. We continued with our old system reserve notifications until our supply of forms were depleted and began using the pressure seal forms for reserves at the beginning of May. Both forms have worked very well. We also have more flexibility to make changes to the form as needed since they are controlled entirely by the software rather than a custom printed form. This served us well when we began accepting credit card payments (discussed earlier in this report) as we were able to put that information on the overdue notices immediately rather than waiting until the next time the forms were printed.

E-Rate

Each year we include e-rate as a part of this report. E-rate is a federally mandated program. Every phone customer is charged a fee on their phone bill called the Universal Service Fund. That money is managed by the Schools & Libraries Corporation, a division of the FCC, and given back to K-12 schools and public libraries in the form of a grant to pay for data and telecommunication costs. To continue receiving e-rate funds, an application has to be filed every year. For Funding Year 2007 (FY08), we received a funding commitment of \$236,238.51. Our discount eligibility is based on the percentage of students eligible for free and reduced lunches in the school districts where our libraries are located. This percentage changes from year to year and our discount percentage for FY08 is 75%. We have received a commitment for Funding Year 2008 (FY09) in the amount of \$216,938.34. (Last year's larger amount included installation costs for the additional Internet connection as well as higher monthly costs on the PRI lines that are used for our VoIP system.)

Add Additional Internet Connection

With the increased usage of public computers and the addition of wireless Internet access, our Internet connection had shown to be using near the maximum bandwidth available which caused slower response time for both staff and customers. In December, we added a 2nd Internet connection. We now have two 100Mb lines that are shared by all libraries for accessing the Internet. As part of this upgrade, we installed a new firewall that would allow maximum throughput so that we could take full advantage of the installed bandwidth.

Evaluating Vista Operating System

This past year we began evaluating the Vista desktop operating system to determine what would need to be done for the library software to work if and when we made a desktop operating system upgrade. We found that Vista does not have much added functionality, just a totally different look. We also discovered that we will have to upgrade the software that connects to our NonStop system for any computer that runs the Vista Operating system. And, all library software will have to be modified for communicating with the NonStop system for it to be able to run on a Vista computer.

Reading the industry news, we have found that many businesses are choosing to not switch to Vista as it requires more processing power and memory with very little if any payoff in performance. A recent article in *Information Week* says that Dell plans to make the XP operating system available to business customers until 2010 when the next Microsoft operating system is scheduled to be released. Information is also already being published about Windows 7, the operating system that is set to replace Vista. We will have to see if that holds true across the industry and try to make a decision based on what is best as well as cost effective for the library system.

Other Software Changes completed during the year

Each year there are many small changes to various parts of the library software that take place but are never mentioned. Some of these include: typesetting of a new subject guide, new software for handling materials sent for rebinding, Oklahoma Moments added to a streaming media server and put on the library's web page for viewing by customers, a safety library catalog with checkin/out functions added for Human Resources, age/gender demographic information now being collected for future needs and use, and public computer compliance monitoring software that allows us to monitor a customer's internet usage if we believe they are trying to circumvent library policies. While many of these items may seem small, each takes time to develop and provides an added benefit to those needing the features.

Additional Services provided by MLS Information Technology Department

Our help desk has logged and our technicians have handled 1,233 service calls over the past year. This does not include calls that can be resolved immediately over the phone. We have chosen to only log calls that require support and/or a visit by a technician to resolve the issue. We are almost completed with upgrading/installing 150 computers as part of our technology replacement cycle.

Many other software changes have been implemented. These items include changes recommended by the Tech Support group, adding in-library and remote access to new subscription databases, upgrading web browser plug-ins as they are released, and various other minor changes.

While we have mentioned it under the RFID item, we would once again like to recognize all of the work put in by the IT staff to complete the RFID tagging project of items already owned by the library system. Every one of the staff put in many hours on this project not only participating in the tagging but also installing the hardware and software on computers at each library. If it had not been for their dedication and teamwork the past seven months, we would not be completed with this project today.

Plans for the Coming Year

The IT department will be involved with moving the computers, network, and phone equipment from the Ralph Ellison Library to a temporary location for its remodel. We will also continue to be involved in working on the new Service Center as well as plan development of the new Northwest Library. In addition to the wiring for computers and phones, there are several other items that are being considered or planned for that involves the IT department. The list below includes projects that we plan to complete during the coming fiscal year as well as others that will be worked on as time allows.

Further Enhancements with use of RFID

While the majority of the tagging project has been completed, there are several other RFID related items that will be added/worked on during the upcoming year:

- ⇒ Tagging of materials that have already been purchased for the new Northwest Library (these items are currently in boxes at the Capitol Hill Library and will need to be unboxed, tagged, re-boxed and labeled that they have had RFID tags applied)
- ⇒ Re-developing the Express Checkout software and units to use the RFID technology
- ⇒ Develop a Standard Interchange Protocol Version 2 (SIP2) module that will allow us to incorporate third party vendors' equipment with our RFID system.
- ⇒ Implement the portable RFID reader. These portable readers will allow staff to capture data by scanning materials at the shelf and checking (real time) for exception items such as materials belonging to other libraries, lost and paid items, missing items, tracer items, and items that have been shelved incorrectly or been coded incorrectly in the computer. Because it is being done in "real" time, corrections can also be made at the shelf without having to transport the material to a backroom or circulation desk for correction.

We have also budgeted for a sorter unit that uses RFID to be used at the new Service Center facility by both Technical Processing for new books and Maintenance for sorting materials that are being transported between buildings. We will also be considering smaller sorter units for the new Northwest Library and possibly retrofitting these units at other libraries over the next few years. Software will need to be developed that will interface to sorter to MLS' Integrated Library System software.

Express Checkout Upgrades

In addition to adding RFID to the Express Checkout units, software will be re-developed so that customers can pay for fines and lost or damaged materials at the Express Checkout units. We will be replacing monitors with monitors that have a card swipe for taking credit cards and also adding a coin box to allow customers to pay with cash for these items. The exterior portion of the coin boxes are already being custom manufactured and we will be purchasing the coin and bill acceptor mechanisms right after the beginning of the fiscal year.

Credit Card Usage at Circulation Desks

Library software has also been re-developed to allow customers to use credit cards at the Circulation Desk when they checkout or return materials. We have budgeted for 1-2 monitors for each library that will have the "card swipe" and will phase in monitors with card swipes at all circulation computers over the next three years.

Ralph Ellison, Service Center & other facilities projects

There are several projects that will require IT's assistance that will come up during this next year. These include:

- ➤ Ralph Ellison remodel IT will need to have wiring pulled in the temporary location, move all computers to this location, and set up VoIP telephones for staff use. We will also be responsible for setting up the new data closet in the remodeled building and having data wiring installed for all computer & phone locations.
- Service Center Depending on construction timing, IT will be responsible for setting up data and telecommunications hardware, having wiring pulled to all computer and phone locations in the building, and moving and setting up staff computers and phones.
- Village & Edmond carpeting New carpeting is planned for the Village and Edmond libraries this year. IT will need to move out all public computers and some staff computers as well as re-install all equipment after the carpet has been replaced.

Technical Processing & new Service Center Equipment & Software

In addition to the RFID sorter that has been planned and budgeted for at the new Service Center, there are also plans for new binning equipment and related software for use by the Technical Processing department. Currently, new materials received are stored on conventional shelving until Cataloging has put the title in the system. This new equipment and software will streamline the process by incorporating the use of a computerized storage of the materials in binning equipment during the receiving and cataloging process. Once the single copy is returned from Cataloging, the additional copies will be retrieved from the storage equipment for processing. This equipment will take up much less floor space than conventional shelving and should reduce the possibilities for injuries due to so much lifting that is done with the current setup.

NonStop Upgrade

Our last upgrade of the NonStop system was in the fall of 2003, approximately six months before we moved to the Downtown Library. To take advantage of progress in technologies, we need to upgrade this system at least every five years. Maintenance costs on a newer system are also much lower. The savings in maintenance will pay for the upgrade in under three years.

Other Projects

In addition to the projects listed above, we will be upgrading/replacing approximately 150 computers. We have an inventory of over 700 devices including computers and printers and needing to replace too many in one year could have a very detrimental effect on the budget and IT staff.

We will also continue maintaining the computers we own, take care of software upgrades including updates to our anti-virus software, web browser plugins, etc. and other service calls as requested.

Future Plans

We continue to have many ongoing future plans. Some of these plans may not be completed in this fiscal year, but we need to maintain awareness of the needs so that we do not come up with surprises in the future and find ourselves unprepared. These plans include:

- Supporting Technology as part of the Library's Strategic Plan
- Keeping abreast of emerging technologies
- > Re-evaluating our software for use by both customers and staff
- Updating a portion of the hardware each year
- > Evaluating the desktop operating system
- > Evaluating the server operating system
- > Evaluating and updating the communications systems as needed

In closing, it seems that we say this every year, but this has once again been a busy, but productive year for Information Technology at MLS. In the coming year, we are continuing to look forward in providing customers and staff with the new and exciting items and supporting their information technology needs.

<u>Information Technology System Description</u>

Summary Description of Information Technology System

The Metropolitan Library Integrated System (MetropoLIS) provides vital automation 24 hours/7 days a week. It supports over 700 networked devices, including computers and printers, throughout the library system. The computers include 21 servers, 208 public computers, 10 Express Checkout computers, 38 Children's computers, 60 CyberMARS catalogs, and 248 staff computers as well as computers that manage the public computer signup and public printing. Hardware for MetropoLIS includes a Hewlett-Packard (HP) NonStop database server with four gigabytes of memory and 144 gigabytes of mirrored disk storage. The HP NonStop system contains the databases and software that are accessed by CyberMARS through the Internet, the Z39.50 gateway, as well as all of the library support functions including circulation, in-library catalog searching, materials acquisition, cataloging of materials, accounts payable, payroll and personnel functions, etc.

The Library has 18 Windows 2000/2003 servers that provide services for the system's network. Two of the servers are the primary and backup domain controllers that manage security services for the library's network and provide internal Domain Name Services. Services also provided through the servers include: Web Page services for the library, CyberMARS, a Z39.50 gateway through the Library of Congress, an internal meeting calendar, access to the staff catalog, backup files for disaster recovery, support of the Raisers' Edge software used by Development and the Friends, management of the anti-virus/anti-spyware software, the Oklahoma Images and Oklahoma Folklore databases, Oklahoma Moments videos, the meeting room booking database, and Internet filtering for wireless customers. Two additional servers run the Linux operating system and provide the Bess filtering service for the libraries' computers. Five additional servers are specialty servers for operating the VoIP phone system and managing the wireless network.

The network devices located at the various library agencies are connected to the servers through the use of data communication circuits. All full-service libraries and the Maintenance/Outreach center are connected to the network through 100Mb data communication lines. Downtown, where the servers are located, has devices directly connected without use of data circuits. The Jones Library connects to the library network via a T-1 line through the Choctaw Library; Luther connects through Edmond Library via a T-1 line, Harrah and Nicoma Park have T-1 lines connected through Midwest City, and Wright has a T-1 line connected through Southern Oaks. The library system's connection to the Internet consists of two 100Mb circuit from the computer center at Downtown to our Internet Provider, OneNet.

Z39.50 makes it possible for a user in one system to search and retrieve information from other computer systems (that have also implemented Z39.50) without knowing the search syntax that is used by those other systems. Many libraries across the world access the MLS Z39.50 gateway server application to obtain catalog and holdings information using a Z39.50 client. PC applications that communicate with the NonStop system use Remote Server Call (RSC) to send messages between the two systems.

MLS Philosophy re: Software Development

The Metropolitan Library System develops much of its software in-house without using a turnkey software vendor. Our philosophy regarding library automation is to redevelop and update a portion of our software and replace a portion of our computer hardware each year. Using this approach, we can avoid the trauma that other libraries deal with when making an automation upgrade -- throwing out the entire system and choosing a new vendor. However, at any given point in time, MLS has the luxury of migrating to a turnkey system if it so chooses. With our

given philosophy in place, this migration could take place on a timetable that would allow implementation at a well thought out pace.

Another part of our philosophy is to implement leading-edge technology while avoiding cutting-edge technology which is also referred to as the bleeding-edge. One example of this is that although we have been keeping abreast of the advancement of RFID technology for almost ten years, we did not recommend its adoption and implementation until this year. This is because it was still evolving as a new technology and had not yet stabilized with standards across the industry and the return on investment did not justify purchase and implementation of the technology. We will continue to research and evaluate new technologies for possible use and improved processes for the library and make recommendations for purchase and implementation as warranted.

EXECUTIVE DIRECTOR'S REPORT

JUNE 2008

Primary Book Vendor

Metropolitan Library System policy AM 200 Purchasing call for an annual service evaluation of the primary book vendor. Karen Marriott, Dep. Ex. Dir. for Materials Services/Outreach completed a performance evaluation for Baker & Taylor, our primary book vendor, fro the period July 1, 2007 through May 30, 2008. The evaluation shows that Baker & Taylor has met or exceeded all but one of the requirements of the current contract for fiscal year 07-08.

- As of May 5, discounts received are 1.71% higher than estimated.
- At this point in the fiscal year, the fill rate is at 89%; so it is unlikely that the goal rate of 90% will not be reached at the end of the fiscal year.
- Problems with receipt of materials have been low; 97.1% of invoices and 99.7% of materials were received without problems.
- 100% of requests for assistance were handled in a satisfactory manner in response to the customer service response time.

As in recent years, the only area where performance has not met specifications is first shipment fill rate. However, with at least 70% of books now being ordered pre-publication; this is a difficult standard to evaluate.

Based on this evaluation, Baker and Taylor continues to be the best option for MLS and staff recommends that they continue to be the primary book vendor in FY09.

Marketing/PR piece receives Best of Show award

I am pleased to announce that our Marketing department received an honorable mention award in the 2008 Best of Show competiton in the Printed Materials Promotion Websites category from the American Library Association. Over 360 entries were received and awards were given for 1st place and honorable mention. So needless to say, we are very proud of this recognition. The award was given for our Collector's Series Oklahoma Images bookmarks in honor of the Oklahoma Centennial. Kim Terry will receive this award during the Library Administration Management Association (LAMA) Swap and Shop event at the ALA Conference in Anaheim.

American Library Association Annual Conference

Several MLS staffers will be going to the annual ALA conference in Anaheim, Ca. Stacy Schrank is the incoming President Elect of the CLENE roundtable, which focuses on continuing education for library staff; Denyvetta Davis is active in the black caucus for ALA members and several other committees, and I am a member of the Public Awareness Committee which works on advocacy issues for libraries and promoting awareness of library services. In addition, Kay Bauman, Kim Terry, Karen Marriott and Pauline Adkins will be attending the conference. We will cheer Kim on when she receives the marketing award!

MLS and Rose State College Collaborating to present a "Big Read" program

Page 2 of 5

MLS will partner with rose State College this fall on "The Big Read", an initiative of the National Endowment for the Arts designed to restore reading to the center of American culture. Big Read participating communities choose one of 16 books to share in the community. Oklahoma county's Big Read will be Ray Bradbury's classic, *Fahrenheit 451*.

The event will kick-off during National Banned Books week, September 27-October 4. Other events devoted specifically to the book such as discussion groups, readings, and film screenings of the 1966 movie version, starring Julie Christie, will continue throughout October.

Summer Reading is off to a great start!

Libraries across the system have been inundated with kids for the past two weeks as they try "To catch the reading bug", the theme of our summer reading program for children. "Metamorphosis" is the teen program this year and is being enthusiastically received by teens across the county. I have attached some of the PR pieces that have been done to promote Summer at the library for children and teens.

Capital Projects Update

The **Northwest Library** architectural contract with LWPB was approved by the Oklahoma City council on May 20th *and the design work has started*. During the week of June 16-20, the architects will be holding a "design charrette" with Oklahoma City staff, library staff and selected consultants. This week long meeting will be the basis for verifying the building program, defining both space relationships and the shape of the building. It will also establish the placement of the building on the property. This collection of the information is part of the "schematic design phase". The project is scheduled for bid on March 25, 2009. LWPB architects and Richard Bauer of Phoenix will be leading the meetings. The Arabian library, designed by Richard Bauer, is featured in the latest issue of Architectural Record. A copy of the article will be available at the meeting for any who might like to see it.

Construction bid documents for the **Service Center** were issued on June 5th and bids are to be submitted to MLS on July 1st. A recommendation for award is to be presented at the July 19th Commission meeting.

Construction bid documents for the **Ralph Ellison Library** were issued on June 10th and bids are to be submitted to OKC on July 8th. Related to this work, a recommendation for modification of the RE Project Agreement will be presented at the MLC July meeting. The award of the contract by OKC is anticipated at the July 27th city council meeting. Construction is expected to begin on August 18th.

As a requirement of the **Capitol Hill Library** project, the parking issue must be resolved first. MLS is working with OKC and other community leaders and organizations to explore all options.

DIRECTOR OUTREACH ACTIVITIES

- Attended Rotary 29 Club Meetings
- Attended OLA Committee Meetings
- Attended Public Library Director Meeting
- Taping of Television program "Read About It"
